Strategic Deployment: Capturing Stranded Demand

These captive-demand environments guarantee a baseline footfall of 150,000+ vehicles annually.

They are structurally hostile to R25M+ legacy stations, making them exclusive “Blue Ocean” zones for modular pods.

CHOOSE YOUR MOJA

When it comes to empowering entrepreneurs, Moja gives you two ways to **FIST BUMP** your future.

MOJA
PREMIUM

Upmarket yet still very affordable , Moja Premium is perfect for urban residential areas, housing estates and premier traffic locations like seaports.

MOJA
INDUSTRIAL

Unlock all entry barriers to owning a fuel franchise with Moja Industrial- ideal for rural locations and industrial precincts with high volumes of freight traffic.

THE FUEL POD PACKAGE

Diesel - Petrol - Paraffin - Gas

- ✓ Various Storage Capacity available
12 000 to 67 000 Litres
- ✓ Fuel Management System
- ✓ POS System with Moja Moola
- ✓ Admin Office / Staff Room
- ✓ Staff Management

- ✓ RETAIL APPROVED
- ✓ WHOLESALE APPROVED
- ✓ UL142 INTERNATIONAL APPROVED
- ✓ PATENTED

Patent Ref: D134382A01 WCH

Patent Ref: D134382A01 WCH

Patent Ref: D134382A01 WCH

MOJA Dual Petrol/Diesel Pods

- These will be the First aboveground Petrol Pods installed in a retail space in South Africa.

From Concept to Product

Twelve Moja Diesel Pods

- Completed 1 million Liter Diesel Depot built entirely with Moja Pods.

Custom Designs

Patent Ref: D134382A00 WCH

MOJA for Taxi/Bus Ranks

- ✓ Cashless Operation
- ✓ Full Control from your PC or Mobile phone
- ✓ POS System with Moja Moola
- ✓ Rewards System for recurring use
- ✓ Steel Shutter Doors for security

Unlocking Land Value & Spatial Flexibility

Traditional stations permanently encumber real estate with underground tanks, triggering massive environmental remediation liabilities if decommissioned. The Mojapod decouples fuel retail from real estate—if demand shifts, the asset moves.

Deployment -----> **Market Shift** -----> **Redeployment**

GAS

Product	10m3 LPG storage tank
Normal Diameter	1600mm
Designed Pressure	1.77MPa
Max pressure	1.61Mpa
Whole Dimension	7260x1800x2310
Tank Dimension	6866x1800x2100mm
Side thickness	10mm
Bottom thickness	10mm
Curb weight:	3750kg
Loading weight	4200kg
Total weight	7950kg
Filling factor	0.95
Medium density	420kg/m3
Designed Temperature	50°C
Tank material	Q345R , 16 MnIII, Q370R
Corrosion	1mm
Heating testing	PWHT(bulk heat treatment)
Water Testing	2.22 Mpa
Hermetic testing	1.77 Mpa
Safety spare parts for LPG tank	1, Safety Valve 2, Liquid gage 3, Pressure gage 4, Temperature gage
Safety spare parts for gas pipeline system	1, Pump shock tube 2, Pipe flange 3, Pump outlet check valve 4, Safe backflow 5, Piping safety valves
Standard configuration	1, 10m3 LPG storage tank 2, Pump 3, Weighting meter machine
Manufacturer Standard	GB150 Steel pressure vessel, pressure vessel safety technology to monitor the procedures

MINI BULK

Where a Moja Pod can work:

Mining Sector

- The Pod can easily be Installed on a Mine and Awarded to the Local Community a Percentage of a Mine's Diesel Purchases can then be allocated to the Pod Owner. Current Fuel supplier will still deliver Fuel to both The mine and the Pod owner

Informal Areas

- Moja Energy Pod is perfect for the rural areas where you can easily put up a pod at a taxi rank or informal trading area where you don't want to invest extensive capital into Civils and Construction.

Developing Areas

- A Moja Energy Pod is perfect for a site that is not a "big pumper" with large volumes of fuel from the start, you can easily add Pods as the site grows in Volume.

Property Sector

- **HOUSING DEVELOPMENT – INDUSTRIAL/OFFICE PARKS**

For Marketing

- **EXHIBITION (NAMPO) – OUTDOOR FESTIVALS – TEMPORARY SITES**

MOOLA

MOOLA

“KASI CRYPTO”

Kasi is a Hub of growing trades, Spaza's, Shebeen's, Taxi Ranks so why don't they have their own coin? That is exactly what Moja Moola is a coin for Kasi Traders and People.

The First Token made for Kasi, linking all your trades Spaza's, Shebeen's, Taxi Ranks and All Energy Pods on one system and keeping the tokens inside the Kasi, far away from the banks.

Our audience

Source of interest

No matter their age, gender, occupation, demographic profile the upliftment of the socio-economic state is a common goal and a vested interest.

BUILDING A STRONGER FUTURE. TOGETHER.

A community that aspires to a brighter future; one that is uniquely South African, inclusive and full of opportunity.

TRULY OPEN TO ALL

Moja Moola is open to all, regardless of their banking status, their nationality or their financial status

All consumers have access to Moola, the **unbanked**, the **undocumented**, and foreign nationals

Customer Loyalty

Digital eco-system community specific.

Digital smart contract used to automate economic incentives.

Earn Points on Every Transaction: Informal sector customers earn Moola points for deposits at Moja, Cash Connect and other ATMs.

Extra points and discounts encourage frequent refueling at Moja Fuel Pods, driving loyalty.

Increase basket of goods & frequency offering to communities with increased Corporate Partners.

Branded loyalty card, keeping MOJA in the consumer awareness

MOOLA

MANAGEMENT

Fuel Management System

With the smart forecourt system installed, a customer pulls up to the filling station and will be guided by the lights above the fuel pumps and surrounding a smart screen at each pump.

A green light indicates that a pump is available.

An amber light indicates the pump is occupied and a customer is waiting.

A blue light indicates that a transaction is in process and that the bay will become available shortly.

A red light indicates that a pump is out of order.

Once the customer pulls into the bay a smart bracelet worn by all the petrol attendants will alert them to the presence of a new customer. The smart screen allows the client to select the fuel and the amount they want to spend.

Once the client has made a selection, the petrol attendant will unlock the pump using facial recognition and proceed to refill the truck with the authorized amount.

The smart forecourt system is designed to eliminate human error. Should attendant attempt to refill car with the wrong fuel. A warning will be sounded.

Cameras record the entire interaction between the petrol attendant and the customer. Footage is archived for three days and can be pulled up to resolve any disputes.

Moja Fuel Pods is committed to making your forecourts a safe and secure space for your staff and your clients.

Cameras placed on the foot boards will capture and record all vehicles and registrations, which means that we can flag stolen vehicles cloned number plates and even clients who drove off without paying for their fuel.

Our system sends all information to a database available to all clients on the smart forecourt system. And our system is linked to a major security company who will deal with danger with the appropriate response.

The smart forecourt system records all data which means that you can track customer spending, inventory and staff movements in real time, even when you're not on the premises.

How does it Work?

- ❖ Wetstock Reconciliations
- ❖ Securing Dispensing for Fleet/Assets
- ❖ Integration by ST500 Controller
- ❖ Delivery into Reporting Cloud

Dispensing Control

- ❖ Pump Controller ST500
- ❖ Locks All Pumps
- ❖ Authorises Fuel via:
 - ❖ iButton Tag
 - ❖ iPIN Number
 - ❖ RFID on Vehicle
- ❖ Generates Transaction
- ❖ Engine Hour Option

The Legal Stuff

The Moja “Fuel Pod” Tanks is **UL142 Steel Aboveground Tanks for Flammable and Combustible Liquids** approved and is currently installed on many mines across Africa

Moja can be used with either a Retail or Wholesale License.

A wholesale license holder may Invoice a minimum of 1500L per transaction.

Moja is currently in communication with The DME to obtain a Bespoke Licence to suite our Moja Pods Mini-Filling station concept.

“REGISTERED PATENT DESIGN”
